

Fair Haven Public Schools

SCHOOL YEAR 2022-20223

AHERA NOTIFICATION

In accordance with the United States Environmental Protection Agency's asbestos-containing materials in the School Rule (40CFR 763 Subpart E, commonly referred to as the AHERA Regulations), please be advised that since the last Annual Notification of Asbestos Management Activities, the Fairhaven Public Schools has undertaken abatement activities.

These activities are the results of building renovations being conducted at Viola Sickles Elementary School. During construction activities asbestos containing floor tile was found and removed by a licensed asbestos abatement contractor.

Six (6)-month surveillances are conducted once every six months for the purpose of monitoring the condition of intact asbestos containing materials previously identified in the Management Plan for each building. The results of these surveillances are incorporated into the Management Plan and are used to schedule maintenance and response activities.

A copy of each school Management Plan is on file in the main office of each building, as well as in the Supervisor of Buildings and Grounds Office. The Management Plan is available for inspection by employees, parents and the public.

The Fairhaven Public Schools has designated Mr. Robert Romano, Supervisor of Buildings and Grounds as the designated person certified to ensure that the requirements of AHERA are properly met and implemented.

Any questions concerning the AHERA Plan should be directed to Mr. Romano at romanor@Fairhaven.edu.
