

GEORGIA HEALTH SURVEY

The Georgia Student Health Survey (GSHS) is an anonymous, statewide survey that offers a primary source of middle student data on topics related to school safety and wellbeing, including school climate, graduation, school dropouts, alcohol and drug use, bullying and harassment, suicide, nutrition, and sedentary behaviors. All Georgia public schools are required to participate in the GSHS. School personnel and parents are also encouraged to participate in the health survey.

Student

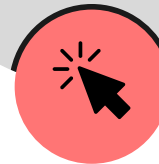

If you are a student at Liberty Middle School, please click the arrow below to access your Georgia Student Health Survey.

School Personnel

If you are school personnel at Liberty Middle School, please click the arrow below to access your Georgia School Personnel Survey.

Parent
