

Chromebook Summer Care

Keep Chromebook in a safe, dry space

Keep Chromebook away from food or drink

Keep Chromebook free of stickers, paint, nailpolish, etc.

Keep Chromebook keys on the keyboard

Keep Chromebook charged

Twice per month power on device and check for updates to prevent the “deep sleep”:

- Click the time in the bottom right corner.
- Click on the settings (the gear icon).
- A new window will open. On the left side menu, click on the very bottom choice that says “About Chrome OS”.
- At the top of the next window, click “Check for updates”. This will begin an update if needed. Once the update is complete, you will be prompted to restart. Please restart, and once the sign-in screen is displayed, the update is complete and you can continue using the Chromebook, or power it down and store it safely.
