

# ELLET CLC BUILDING UPDATE

March 15, 2019

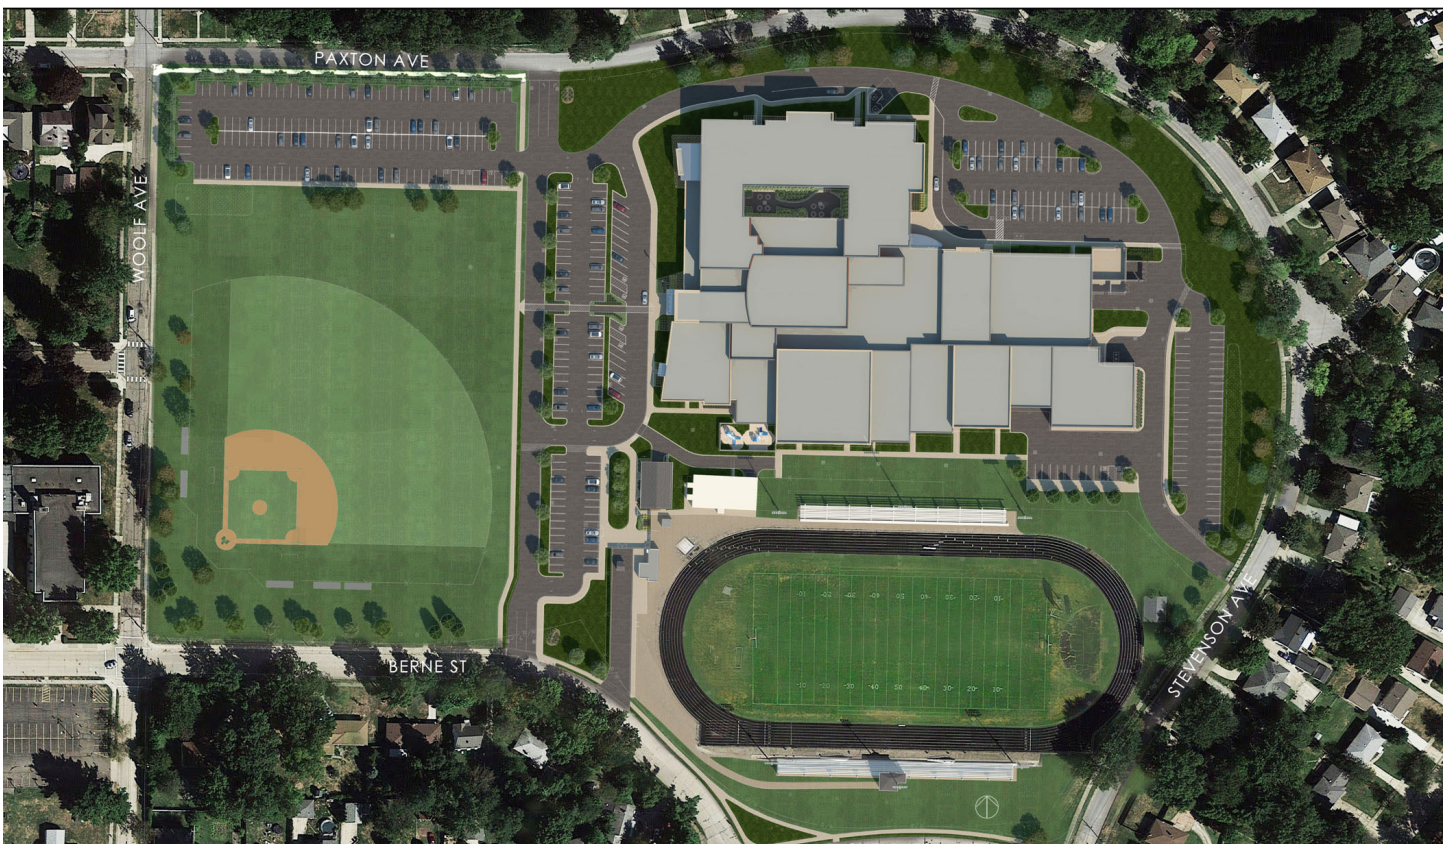

Dear Resident,

As the construction manager for the new Akron Ellet Community Learning Center, we are committed to managing the construction, safety and overall quality control of the job site. This letter is an effort to keep the surrounding neighbors informed of our progress and activities on site.

The Ellet CLC is in the final stages of construction, with the grand opening scheduled for the 2019-2020 school year. As weather starts to break, construction work will commence on the late site work including final grading, sidewalks and asphalt paving. At the end of this school year, the district will begin moving from the old building into the new. Construction crews will then shift to the west end of the site to complete final sitework. Abatement and demolition of the existing Ellet High School will start by the end of 2019, with the new ballfield and site work complete by 2021.

***If at any time you have questions, issues, frustrations or general comments please call Hammond Construction's team directly so that we can quickly address your concerns. Below is our on-site personnel for you to contact, we welcome you to utilize these contacts as often as needed.***
