

These are some of the coding apps we use in STELLAR.

Kidlo Coding-A great app for all levels. More experienced coders can try the 'Advanced' level, which combines all the skills taught in previous levels.

Box Island- Use the "hour of code" option to play for free.

Dash Apps: If you type in Wonder in the app store you will see multiple apps that are compatible with Dash and Dot. Blockly is the most challenging and requires the most coding.

Wonder

For ages 6+

Wonder makes robotics as delightful as finger painting. A picture-based coding language built for kids, children create detailed behaviors for Dash, creating the robot pet, pal or sidekick of their dreams.

Blockly

For ages 6+

Designed for children aged 6 and above, Blockly introduces advanced concepts of coding through playful projects and puzzles. Exploring variables, events, conditionals and more, Dash becomes a dancer, adventurer, artist and prankster, powered by kid's code.

Path

For ages 6+

With Path, kids start with the fundamentals of robotics and coding before they can read! Drawing a route on their tablet or smartphone, children send Dash on journeys around the house with their code.

Go

For ages 6+

Give Dash a new name, spin in a circle, blink a robot eye and more! Exploring the robot's lights, sounds, sensors and movements, Go is the first step to getting to know all that Dash can do.

Xylo

For ages 6+

Program Dash to be a musical performer with Xylo. Used with Xylophone accessory, kids can program Dash to play their favorite song or make new tunes of their own.
