GLEN ROCK COMMUNITY SCHOOL

Preschool
3 Year Old Program

The GRCS Preschool provides an environment where children, through active learning principles, will continue to grow socially, emotionally, intellectually and physically. Children in our program will gain greater confidence and will develop positive attitudes toward school, teachers and their classmates, while they develop skills intended to prepare them for their future school environment.

Our teachers engage the students in stimulating and challenging activities through various teaching methods. They are supportive of all student learning styles and developmental differences. All of our teachers are certified in Elementary or Early Childhood Education and are assisted in class by at least one experienced aide. We are the only preschool affiliated with the Glen Rock School District.

Emergent Academic Skills Centers are a wonderful way to engage students and grow curiosity. Math, reading, art and science centers allow the children to explore various themes where they are exposed to words and numbers.

Inquisitive Learners This may be the first learning experience in a classroom for a child. The teacher and aide will assist the child in becoming more independent through various structured and unstructured activities. From choosing a book to working at their own pace, students will continue to develop their curiosity.

Social Growth Friendships are formed in the classroom. Sharing and conversation will assimilate the children to group environments. The nurturing and safe classroom create a comfortable atmosphere for children to express their evolving personalities.

Creative Expression Through visual and performing arts, children have an opportunity to express and grow their creativity. Participation in drawing, painting, singing and dancing will help develop fine and gross motor skills. Special events and visitors to the class provide additional creative instruction.

Interpretation and Reasoning

Students are asked to interpret stories and scientific findings. Through drawing and verbal expression, students build the foundation for comprehension skills. Students are encouraged to ask questions and continue exploration through experiments and technology.

Development and Growth During early childhood years, growth and development are highly individual. Children are encouraged to experience the world around them at their own rate, but always in positive progression. Our caring teacher and aide are always available for questions and enjoy giving updates about student growth, as well as addressing any challenges.
