GLEN ROCK COMMUNITY SCHOOL

Preschool
Pre-K Program
(4 & 5 Year Old)

The GRCS Preschool provides an environment where children, through active learning principles, will continue to grow socially, emotionally, intellectually and physically. Children in our program will gain greater confidence and will develop positive attitudes toward school, teachers and their classmates, while they develop skills intended to prepare them for their future school environment.

Our teachers engage the students in stimulating and challenging activities through various teaching methods. They are supportive of all student learning styles and developmental differences. All of our teachers are certified in Elementary or Early Childhood Education and are assisted in class by at least one experienced aide. We are the only preschool affiliated with the Glen Rock School District.

Academic Foundation & Growth Our program follows a curriculum that covers all key learning domains in a fun and developmentally appropriate way for young learners. Language arts lessons follow a balanced literacy approach to teaching reading and writing. Math lessons incorporate hands-on learning activities with the use of manipulatives. Social studies lessons focus on the students and their world around them. Science investigations include the study of apples, pumpkins, butterflies, colors, volcanos, seeds and plants.

Social and Emotional Growth Our classroom is child-centered and a safe environment for students to form relationships with peers and teachers. We nurture social interactions and work with students in resolving conflicts as they arise. We practice kindness, respect for others and good manners.

Creative Exploration Creativity is encouraged and developed through open-ended play in centers. These centers include sensory table, puzzles, games, dramatic play and writing. During the course of the day, students also paint, sing and dance. Special events and visitors to the class provide additional creative instruction.

Fine & Gross Motor Skills Each day begins with students building fine motor manipulatives, constructing with play doh, lacing cards, cutting with scissors, building patterns with beads and so on. Gross motor skills are fostered through outdoor play and movement activities in the classroom.

Kindergarten Readiness Assessments of students' learning are taken both formally and informally throughout the year. The assessments are shared with parents during conferences. Full and extended day options give students an opportunity to spend more time in the classroom in preparation for Kindergarten.
