DIRECTOR

Heather Campbell

Schools within the Rainy River District School Board will conduct a school climate survey with parents/guardians of students from Grades 4-12 between Monday, November 21 to Friday, December 2, 2022. School boards in Ontario are mandated by the Ministry of Education to conduct these surveys of students, staff and parents/guardians every two years. These surveys are an important tool in helping schools to gain insight into parent/guardian perceptions of school safety and in helping to build and sustain positive school environments. The surveys also assist in making informed decisions and plans to help promote safe and inclusive schools and student health and well-being.

The Survey Monkey link is posted on the school's website, the RRDSB Facebook page, and as an announcement through PowerSchool. The questions will focus on your experiences and thoughts related to your child/youth's well-being, with questions focused on safety and inclusion.

If you have more than one child/youth in the school system, please feel free to submit a separate survey for each child. The Survey Monkey settings will allow you to answer the survey more than once from the same device.

This is an opportunity for parents/guardians to have their voices heard on these important topics. The surveys are anonymous and a good response to the survey is vital to obtaining reliable data.

If you have any questions, please contact me.

Sincerely,

Principal
