COVID-19 Suspect Outbreak Hanover Heights Community School

The Grey Bruce Health Unit is working with Bluewater District School Board and the bus company to address a suspect outbreak of COVID-19 associated with Hanover Heights Community School, Hanover. Two positive cases are associated with this suspect outbreak.

A suspect outbreak identifies interim evidence of transmission from person to person. Status will be determined pending additional testing. A single bus route is involved with this suspect outbreak.

The individuals with COVID-19 have been contacted directly by our COVID-19 Case and Contact Management Team. We have worked with the individuals and the school, along with the school board and bus company and have identified all others, both in and out of the school environment, who may have been exposed and have determined their risk level. Any cohorts that have been identified as contacts to the cases have been excluded from school at this time.

Those NOT contacted by Public Health need not take any additional steps including asymptomatic testing.

Public Health is the lead in all outbreaks and case management. Public Health will contact you if you have had close contact with someone who has COVID-19, based on a thorough risk assessment completed only by Public Health.

Determining who has had close contact is a decision that can only be made by Public Health. Anyone at heightened risk of COVID-19 transmission due to close contact to a person with COVID-19 will be contacted by Public Health within 24 hours of the investigation.

The Grey Bruce Health Unit will direct those considered at risk regarding testing requirements and recommendations (e.g., timing). There is no value in anyone being tested before they are notified and instructed to do so by Public Health. Results of early testing are unreliable and place individuals at risk of more testing than is required.

As a reminder to the public, if you develop symptoms consistent with COVID-19, please proceed to your nearest assessment centre for testing.

A healthier future for all.

Fax 519-376-0605

All contact tracing and determination of individual and community risk is made by Public Health. This is true of all cases, whether in schools, workplaces or the community. A health care provider or school official cannot make this decision.
